ABOUT ME

I am a dedicated and adaptable student currently pursuing a diploma in User Experience at the Canadian College of Technology and Business. With a strong foundation in customer service and management from my previous roles, I am now focused on enhancing my technical and design skills to create meaningful digital experiences. In addition to my studies, I actively volunteer at Blue Mountain Church, where I contribute to community projects, further developing my teamwork and organizational skills. I am also certified in First Aid, CPR, and AED, ensuring I am equipped to respond in emergency situations. I am seeking part-time opportunities where I can continue to grow and apply my diverse skill set in a dynamic environment.

Availability: Seeking part-time positions, available everyday from 6am to 3pm
