## PROFILE

I am a young graduate of a DUT in Electrical Engineering and Industrial Computing equivalent to a two-year degree, with 5 years of experience as an industrial electrician with other skills in electricity and automation, looking for a stimulating role in an institution with a dynamic and competitive environment that fosters constructive initiative and the desire to reach higher heights

## PERSONAL SKILLS

- ❖ Perfectly bilingual.
- ❖ Ability to read and interpret electrical schematics.
- ❖ Ability to detect electrical faults and write a report.
- ❖ Maintenance and servicing of an electrical system (electrical and electronic industrial control system) and other devices.
- ❖ Ability to test electrical and electronic equipment and components to verify continuity, current, voltage and resistance.
- ❖ Maintain, repair, install and test switchgear, transformers, distribution panel meters, regulators.
- ❖ Ability to execute preventive maintenance programs and keep maintenance records.
- ❖ Excellent tool skills (Microsoft Office Word, Microsoft Office Excel, PowerPoint, Microsoft Office Access, C).
- ❖ Teamwork and Ability to work under pressure

## PROFESSIONAL EXPERIENCE

**Industrial Electrician at , MMP SA , CAMEROUN ,  
Octobre 2021 till Now.**

- ❖ Read and Interpret Electrical Schematics.
- ❖ Install, Check, Replace and Repair electrical cables, electrical outlets, junction boxes, lighting fixtures and other components.
- ❖ Troubleshoot, maintain and repair electrical industrial control systems and other related devices
- ❖ Design and implement control and power circuits for an electrical installation.
- ❖ Detect electrical faults and malfunctions.
- ❖ Install, maintain and size instruments, industrial equipment and related devices
- ❖ Install, maintain and calibrate industrial instruments and related devices.
- ❖ Carry out preventive maintenance programs and keep maintenance records.
- ❖ Test electrical, electronic equipment and components to check continuity, resistance, current, voltage.
- ❖ Maintain, install and test electric motors and generators.
- ❖ Maintain, install and test cut-off devices, meters, distribution panels, regulators, etc.

**Industrial Electrician at, CAMBUILD SARL BTP, Cameroun  
November 2019 till October 2021.**

- ❖ Read and Interpret Electrical Schematics.
- ❖ Install, Check, Replace and Repair electrical cables, electrical outlets, junction boxes, lighting fixtures and other components.
- ❖ Troubleshoot, maintain and repair electrical industrial control systems and other related devices
- ❖ Design and implement control and power circuits for an electrical installation.
- ❖ Detect electrical faults and malfunctions.
- ❖ Install, maintain and size instruments, industrial equipment and related devices

- ❖ Install, maintain and calibrate industrial instruments and related devices.
- ❖ Carry out preventive maintenance programs and keep maintenance records.
- ❖ Test electrical, electronic equipment and components to check continuity, resistance, current, voltage.
- ❖ Maintain, install and test electric motors and generators.
- ❖ Maintain, install and test cut-off devices, meters, distribution panels, regulators, etc.

## **ACADEMIC QUALIFICATIONS**

- ❖ **DUT** (University of Technology Diploma) in Electrical Engineering and Industrial computing at the Institut University of Technology of Douala **JUILLET 2017**
- ❖ **BACCALAUREAT Serie C** College Alfred Saker **JUIN 2013**

## **HOBBIES**

- . Sport
- . Documentation
- . Cinema

## **REFERENCES**

- ❖ Available upon Request
