Professional Summary

Project management, a strategic method, offers a universal system for clear communication. When paired with years of experience handling projects in various fields like oil and gas, mineral processing, and construction, it builds strong leadership and management skills. With two decades of experience in project management, I am capable of leading diverse projects confidently.

Skills

- Performing integration in planning, execution and monitoring & control considering cost, schedule, scope, quality, resources and risks
 - Experienced in conduct and control Procurement
 - Specification and Blueprint Interpretation
 - Equipment manufacturing
 - Equipment installation
-
